1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,488,961 (hereinafter referred to as Spencer). Spencer teaches a filter comprising a chamber having an interior, a patient connection (4B) and a transport connection (4A) and a support structure as a thin, perforated member (2) having hydrophilic filter medium (3) mounted thereon wherein a flow in a first channel structure from patient connection (4B) to transport connection (4A) allows the flow across the surface of the filter medium (3) and a flow in a second channel structure from transport connection (4A) to patient connection (4B) allows flow through the filter medium (3) and support structure (2) (see figures 1a-1b; col. 3, line 37 - col. 4, line 25).

3. Claims 2-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 20-28 are allowed.

5. Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office Action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to resolve any informalities

remaining therein before the application is passed to issue. This will avoid possible delays in the issue process.

6. Applicant's arguments with respect to claims 1-28 have been considered but are moot in view of the new ground(s) of rejection.
